BiblioLife. Paperback. Book Condition: New. This item is printed on demand. Paperback. 304 pages. Dimensions: 8.0in. x 5.0in. x 0.6in. The rapidly growing interest in home economics is causing this subject slowly to assume the aspect of an exact science. At the present time it is becoming necessary for those expecting to. become housewives to understand at least the elementary phases of a number of sciences, most prominent among which are chemistry and bacteriology. The relation of microorganisms to household affairs has only been recognized in the last few years, but is now felt to be one of the most important phases in the study of the problems of the household. The present work is therefore designed for all interested in household affairs, including not only students of household economics but all persons who have practical charge of homes and are interested in keeping them in the best and most healthful condition.
